

Version 5.30 New Features

Build 1 compiled on 6th June 2018

Introduction

Welcome to Accura Version 5.30

Version 5.30 is the latest release for the Accura MIS with a simultaneous release of Accura Online 5.30. Accura 5.30 introduces a multitude of new features and fixes to the MIS and its related applications.

All clients with a current support contract for Accura (and AccuraOnline if purchased) are entitled to receive and install all software releases as part of their support contract benefits. If you have not already done so, please [sign up for an account](#) on our website to access protected software downloads, user manuals and other content. AccuraOnline upgrades are distributed automatically when released by Accura support.

If you have any questions or queries about the new features or any other Accura related matter, please contact your Accura Support team by emailing support@accuramis.com.

About This Document

This **New Features** document details all the major features added to Accura and Accura Online since the last public releases – Accura 5.21 and Accura Online 5.29.

If you are an end user, please read through this document which summarises the major new features likely to be used by end users.

The technical release notes are aimed at Accura system administrators, advanced users, and Accura support personnel. This is available on request.

Previous versions of release notes and the technical release notes can be found in the Online Resource Area which can be accessed from the Accura Help Menu.

Contents

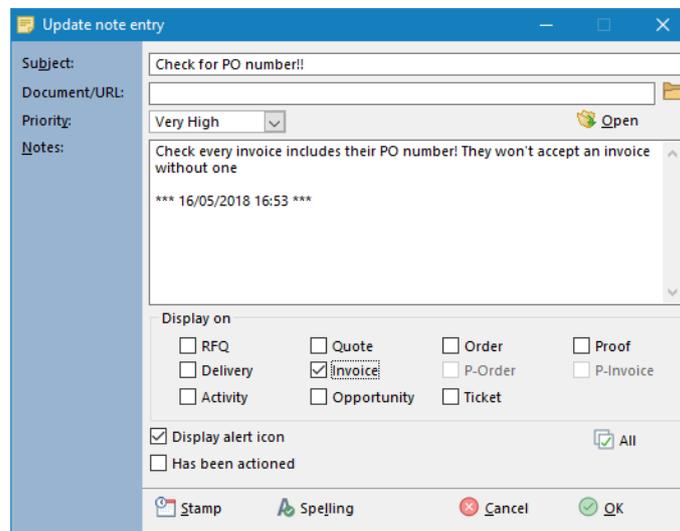

- New Features in Accura Version 5.30 Build 1..... 4**
 - Contextual Pop-up Notepad..... 4
 - EasyPost Courier Integration..... 4
 - Packaging Settings 6
 - Client Browse..... 7
 - Ad-hoc Commission..... 7
 - SMS Engine 8
 - CRM Calendar 9
 - Purchase Order Delivery Option..... 10

- New Features in Accura Online 5.30 11**
 - Advanced Filter Settings..... 11
 - Client-Specific Product Pricing 12
 - Google Integration 13
 - Address Management & Permissions 13
 - Enhanced Colour Customisation 14

New Features in Accura Version 5.30 Build 1

Contextual Pop-up Notepad

Client and supplier pop-up notes have always been displayed whenever the client or supplier was selected into a transaction. These notes can now be contextualised to only display for certain types of transactions. For example, you may want to advise your accounts department of an issue when invoicing but this note is not applicable to other transactions for the same customer. This can be achieved by selecting the relevant checkboxes in the **Display on** section of the note entry.

EasyPost Courier Integration

easypost.

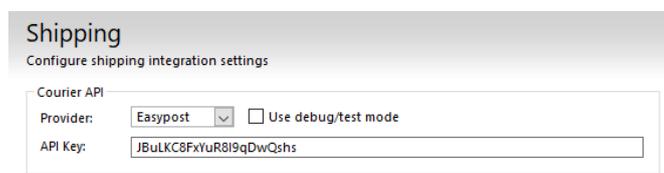

Accura 5.30 introduces a new bolt-on for the standard delivery note and shipping function – integration with EasyPost shipping API. Using this feature will allow you to be able to get accurate shipping prices from your preferred, book your desired service and print approved parcel labels, all without the need to leave your Accura or RDC. This feature eliminates the need for double-entry of information and a separate shipping terminal.

EasyPost support 100+ carriers worldwide, click [here](#) to see a list of all currently supported carriers. Prices start from 1¢ per package and includes consignment tracking. For US customers, address verification is also included. You can see EasyPost pricing [here](#).

To start you will need an EasyPost account and you should sign-up at this URL –

https://www.easypost.com/signup?utm_source=AccuraMIS

Once created, you can easily add in your preferred carriers. All you need then is to grab the API and insert in Accura's shipping defaults

Once done, you can start booking your carrier services from delivery notes. On the Carrier use the **Get-Rates** button. The API will then query your carriers for your available services and rates based on the Accura consignment weight and dimensions.

The screenshot shows a software window titled "Easypost carrier integration" with a sub-header "Get carrier rates". It indicates "Operation complete... 6 quotes returned." and shows "Boxes / Pallets: 6" and "Weight 103.12". The main content is a table with columns for Courier, Service, Local price, Courier quote (Currency and Price), Days, and Delivery due (Date, By, Guaranteed?). The table lists six ParcelForce services with their respective prices and delivery dates.

| Courier | Service | Local price | Courier quote | | Days | Delivery due | | |
|-------------|----------------|-------------|---------------|--------|------|--------------|-------|-------------|
| | | | Currency | Price | | Date | By | Guaranteed? |
| ParcelForce | express48 | £196.08 | GBP | 196.08 | 2 | 16/05/2018 | 17:30 | No |
| ParcelForce | express24 | £227.52 | GBP | 227.52 | 1 | 15/05/2018 | 17:30 | No |
| ParcelForce | expressAM | £274.56 | GBP | 274.56 | 1 | 15/05/2018 | 17:30 | No |
| ParcelForce | express48large | £304.14 | GBP | 304.14 | 2 | 16/05/2018 | 17:30 | No |
| ParcelForce | express10 | £376.62 | GBP | 376.62 | 1 | 15/05/2018 | 17:30 | No |
| ParcelForce | express9 | £447.24 | GBP | 447.24 | 1 | 15/05/2018 | 17:30 | No |

Additional UI elements include a "Re-fetch" button, a "Book" button, a "Labels" button, and a "Close" button. A "Service-type" dropdown is set to "All".

Once booked, you will be able to view and print your parcel labels. These are approved by your carrier and so there is no issue with label compatibility. Once complete, Accura stores the shipment details in the delivery note for easy reference.

Shipment details

Courier: Shipping-ref:

Service: Closed-out

Tracking URL:

Tracking references can be included in any notification emails or SMS by using the appropriate merge tokens.

For a more in-depth guide to set-up and functionality, please watch our [EasyPost Integration video](#)

Packaging Settings

In previous versions of Accura, packaging types were preconfigured and entry of dimensions was always manual. This has now been overhauled and now packaging types are completely user definable along with dimensions and weight. The packaging table can be accessed via the **Setup** menu

| Type | Description | Length | Width | Height | Packed-in | Weight | Is Pallet |
|--|----------------------|--------|--------|--------|-----------|---------|-------------------------------------|
| Box | Box packaging | 32.00 | 25.00 | 25.00 | 500 | 0.2500 | <input type="checkbox"/> |
| DEFAULT | Default packing type | 30.00 | 22.00 | 22.00 | 500 | 0.3200 | <input type="checkbox"/> |
| DWA4 | DWA4 packaging | 30.50 | 22.90 | 22.90 | 500 | 0.9600 | <input type="checkbox"/> |
| PALLET | Standard Pallet | 120.00 | 120.00 | 15.00 | 500 | 28.0000 | <input checked="" type="checkbox"/> |
| <input checked="" type="checkbox"/> STDBOX | Standard A4 | 30.00 | 22.00 | 22.00 | 500 | 0.3200 | <input type="checkbox"/> |

Packaging types can be used in orders, order delivery points, delivery notes and delivery note items.

Update package details

Package-type: PALLET

Description: Standard Pallet

External-ref:

Length (cm): 120.00

Width (cm): 120.00

Height (cm): 15.00

Packed in: 500

Weight (kg): 28.0000

Package is pallet

Default packaging type

Cancel OK

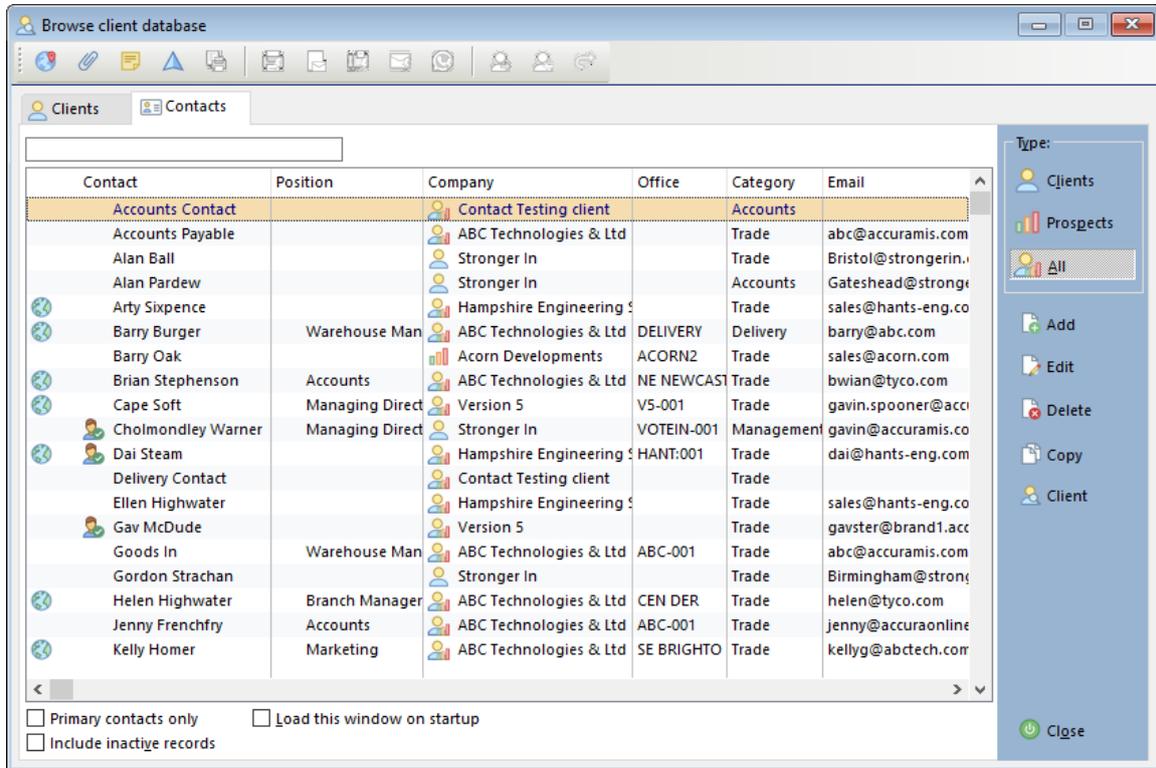

When there are many items on a delivery note, it may be that the entire consignment will be shipped on a pallet or skid. For that purpose, packaging types have the option **Package is a pallet**. When this is set and the pallet package

type is used in the **Custom consignment** area, the **No. Pallets** field will add the weight of the number of pallets to the total weight of the consignment. This ensures the consignment weight is accurate.

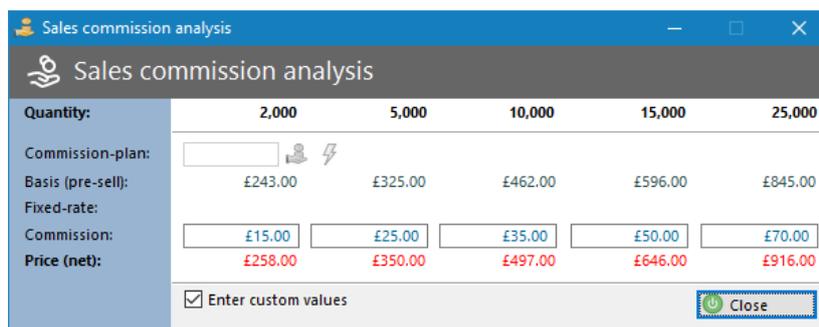

Client Browse

The Client/Prospect browse in both Accura and CRM have been redesigned to include a **Contacts** tab where all contacts are listed alphabetically and easily searchable using keyboard location. This improvement makes it a lot quicker and easier to find a client or contact when the contact name is known but the company name is not.

Ad-hoc Commission

The **commission plan** feature has been further enhanced to include **ad-hoc entry** of commission. By using this, an estimator with the appropriate permission can override a commission plan and enter a fixed rate amount across all quantities.

Commission plans are overridden by ticking the **Enter custom values** checkbox.

SMS Engine

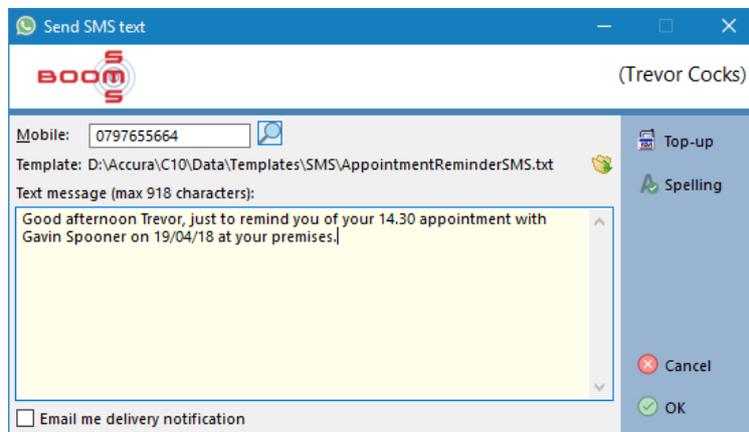

The engine behind the SMS messaging has been replaced with a new, more versatile version allowing us to add some great new functionality.

In addition to the previously supported SMS providers, BoomSMS, BulkSMS and Comapi (formerly known as Dynmark), there is now the option to select two new providers, [Plivo](#) and [Twilio](#).

Accounts can be created on their websites, then the API and authentication details added to the SMS section of the Accura defaults.

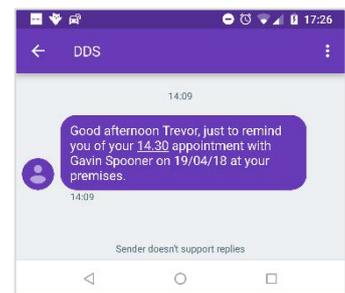

A new feature to the SMS dialog is the ability to be able to select text templates. The templates of course support merge tokens for even quicker entry of data.

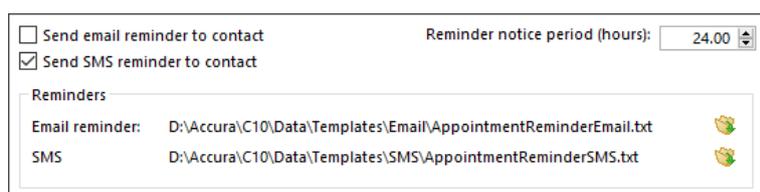

CRM SMS features

For systems with the optional **CRM** module, there is even more new functionality. The first is the ability to send an SMS broadcast. This works in principle in the same way as an email broadcast with the added benefit of going directly to your customer's phones. Using this fantastic marketing tool, you can instantly inform clients of your latest news and offers.

It's also possible now to set up SMS reminders for Appointments and other CRM activity types. This way you can gently remind your contacts of upcoming appointments.

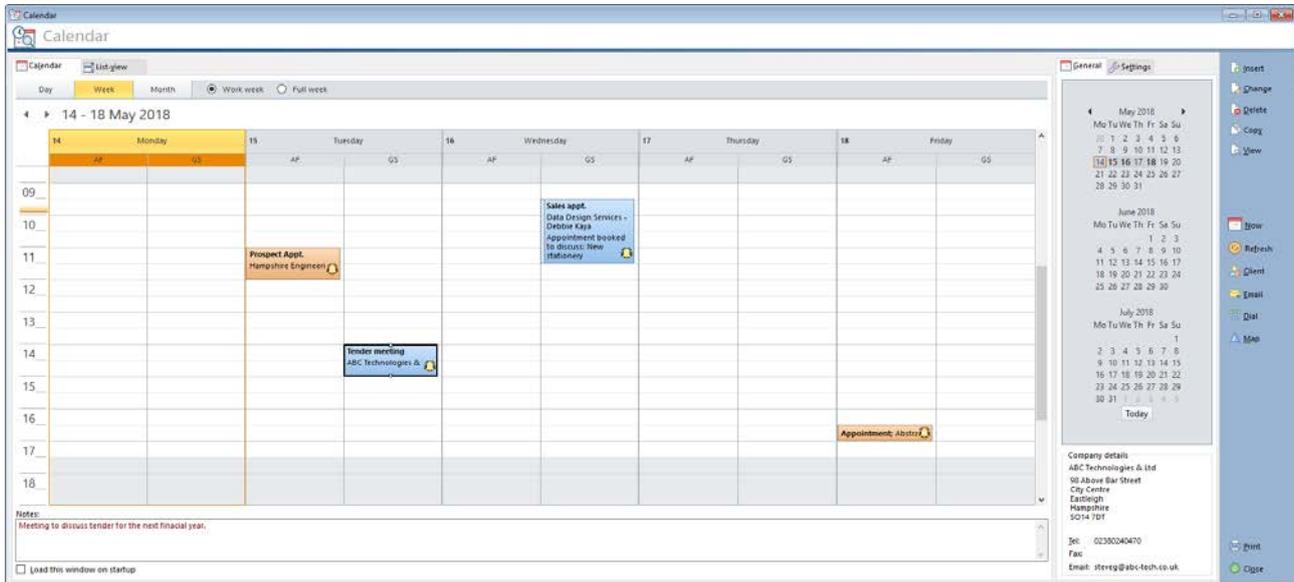

This feature can be switched on in the **Templates** tab of your appointment activity type where you should also select a default SMS reminder template. The reminder SMS will then be sent out in the background at the notice period you've set.

CRM Calendar

Accura CRM's Calendar has been given a major overhaul both cosmetically and functionally. The Calendar has been redesigned to give a more familiar Outlook feel and there are many different MS Office based themes to choose from to customise the Calendar to your own preference.

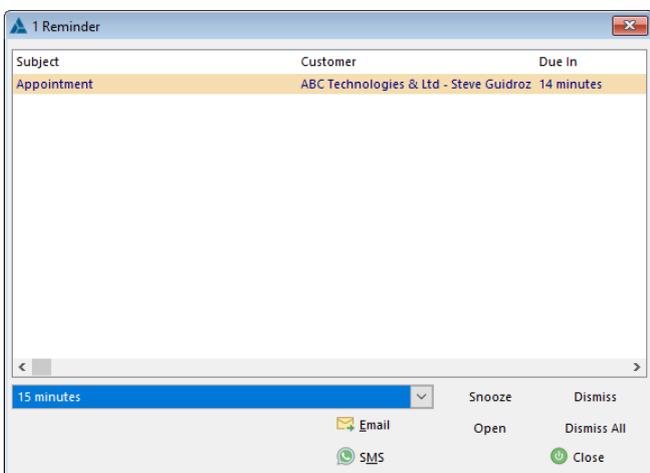

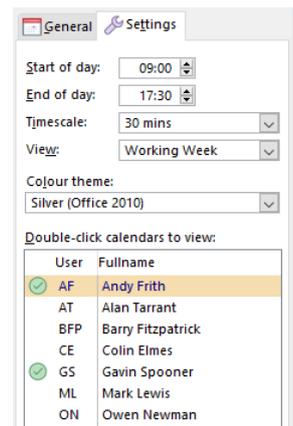

It is now easier to see other user's Calendar dates by selecting the calendars you need to view. You can see many user's calendars side by side or just your own.

On the **Settings** tab in the calendar, you will see a list of users; your own calendar is displayed by default. By simply double clicking on another user, you will then be able to see their diary side-by-side with your own or you can turn your own off. If you would rather users did not have the ability to see other's diaries, you can restrict their access from the CRM tab in their user profile, **User can manage other calendars**. Users can also be omitted from the user list by unticking **Enable appointment calendar**.

On the Settings tab you can also configure the time frame and view as well as choose from the many different themes available,

Each user can have their own appointment colour for ease of use. This is configured within the user's user profile on the CRM tab.

If you do not have your Calendar open, Accura CRM will now display a **Reminder** window to remind you of your upcoming appointments.

The reminder window has all the functionality you would expect such as Snooze and Dismiss but there are also the options to be able to Email or SMS your contact to remind them of the appointment.

Please also see [SMS reminders](#)

Purchase Order Delivery Option

There may be instances when you need a supplier to deliver directly to your customer. There is a new purchase order delivery option called **Job** where the deliver-to address of the purchase order will automatically be set to that of the order's delivery client, contact and address.

Purchase order

Purchase order 1,057

General Delivery Extra Attachments History

Deliver to:

Client Supplier Job Other

Client: ABC Office: SC LIV

Contact: Kevin Forsyth

Name: Tyco Scotland

Address: Almondvale House
Alderstone Road
Livingston
East Lothian
EH54 7DN

Delivery notes:
Please delivery directly to our customer using UNMARKED boxes.

Reset

Output job artwork file(s) Cancel OK

To determine whether a purchase order should use the job delivery address is a **per supplier** setting. This can't be switch on or of in each supplier in the Extra tab of supplier maintenance.

Assign delivery address from job to purchase-order

New Features in Accura Online 5.30

Advanced Filter Settings

Filters throughout Accura Online have been completely redesigned to improve both functionality and performance.

The screenshot shows the 'STORE' section of the Accura Online website. At the top, there is a navigation bar with social media icons (Facebook, Twitter, Google+, LinkedIn) and a user greeting 'Welcome Gavini' with a 'Logout' button. Below this is a dark header with the 'Abstract Group' logo, contact information (Call Us: +44 (0)23 8024 0470, Fax Us: +44 (0)23 8025 2573, Email Us: sales@accuramis.com), and a shopping cart icon. The main navigation bar includes 'HOME', 'QUOTES', 'ORDERS', 'PROOFS', 'STORE' (highlighted), and 'CONTACT US'. The 'Products' section features a search bar, a 'Sort by' dropdown set to 'Product Code: A-Z', and a 'View as' toggle. On the left, there are two filter panels: 'Stock Type' with 'Stationery' selected, and 'Brand' with 'Abstract Group' selected. The main product grid displays three items: 'ABS_C4_ENV (Stationery)' priced at £51.63 each (2250 in stock), 'ABS_COMP (Stationery)' priced at £12.23 each (6000 in stock), and 'ABS_DL_ENV (Stationery)' priced at £33.09 each (1000 in stock). Each product card includes a 'View Details' button.

The filters can be displayed, hidden and renamed at domain or client level, contracted and expanded, and are context sensitive. This means that 'dynamic' filters throughout the website remove all filter entries no longer valid to the data being displayed.

The screenshot shows the 'Product Filters' configuration interface. It is organized into a grid of filter settings. Each filter has a title field, an input field for the filter name, and a checkbox for 'enabled'. The filters shown are: 'Sub-category filter title' (Stock Type, enabled), 'Group filter title' (Brand, enabled), 'Colour filter title' (Colour filter enabled, disabled), 'Finish filter title' (Finish filter enabled, disabled), 'Size filter title' (Size filter enabled, disabled), and 'Locations filter title' (Locations filter enabled, disabled).

Product 'finish' values now appear as a new optional filter in the Store. Filter display and renaming options can be found under in the main Settings page in the Admin area or within client branding.

Client-Specific Product Pricing

Online store product pricing is now fully customisable per client allowing up to 10 price breaks and a thereafter for each product. Price-lists are set up from within Accura via the Stock – Price-lists menu.

Price-list maintenance

Code: ABC
 Description: Price list for ABC
 Expiry date: 06/05/2028 At: 23:59

Defaults for new products
 Rate-type: % Discount Adjustment Sell-rate
 Adjust (+/-): £-5.00

| Code | Description | Rate-type | Rate-value | Sell-rate | New-rate | Per | Created Date | Time |
|--------|----------------------------|------------|------------|-----------|----------|-----|--------------|------|
| TYC001 | Letterheads - Market Harbo | Discount | 10.00% | 80.5219 | £72.47 | 500 | 09/05/2018 | 13 |
| TYC002 | Letterheads - Aberdeen | Discount | 10.00% | 106.2889 | £95.66 | 500 | 09/05/2018 | 12 |
| TYC003 | Letterheads - Skelmersdale | Discount | 10.00% | 59.0494 | £53.14 | 500 | 09/05/2018 | 12 |
| TYC005 | Compliment Slips | Discount | 10.00% | 59.0494 | £53.14 | 500 | 09/05/2018 | 12 |
| TYC010 | Business Cards | Discount | 10.00% | 12.8835 | £11.60 | 250 | 09/05/2018 | 12 |
| TYC020 | Sales Order Sheet | Discount | 10.00% | 13.4204 | £12.08 | 500 | 09/05/2018 | 12 |
| TYC021 | Purchase Order Sheet | Discount | 10.00% | 14.9771 | £13.48 | 500 | 09/05/2018 | 12 |
| TYC022 | Statement Sheet | Discount | 10.00% | 15.0308 | £13.53 | 500 | 09/05/2018 | 12 |
| TYC030 | Order Folder - Orange | Adjustment | £-5.00 | 20.6136 | £15.61 | 100 | 09/05/2018 | 17 |
| TYC031 | Order Folder - Blue | Adjustment | £-5.00 | 40.2610 | £35.26 | 100 | 09/05/2018 | 17 |
| TYC032 | Yellow Folder | Adjustment | £-5.00 | 83.7428 | £78.74 | 100 | 09/05/2018 | 17 |

Rates can be set as a percentage **Discount** of the base sell rate, a fixed rate **Adjustment** of the base sell rate or a fixed **Sell rate**. Each product can in turn be edited to set a pricing matrix of up to 10 price breaks and a thereafter rate.

The product min order quantity, max order quantity, and quantity choices values can also be customised per client in price-lists. Client-specific pricing also supports an expiry date and time.

Multiple clients can belong to a single pricelist but a client can only belong to one price list. If a client is selected into a second pricelist, this will override the original selection. In addition to the Clients tab of the price list maintenance browse, you can view and select a pricelist from the Products tab in client maintenance.

It should be noted that if client-specific pricing exists on template-linked products, the products will behave as if they are no longer template-linked, for example they will no longer allow live price calculation.

Google Integration

The Sign-up registration form allows automatic population of address details via Google.

The screenshot shows a registration form with a 'Locate Your Address' section on the left and a 'Country' dropdown on the right. The 'Locate Your Address' section has a search bar containing 'Lakesbury' and a dropdown menu showing 'Lakesbury Mews, Hillingbury Road, Chandler's Ford, Eastleigh, UK'. Below the search bar is a small map. The 'Country' dropdown is set to 'United Kingdom'. There is also a 'Telephone (required)' field.

- The Google map displayed on 'Contact Us' page now requires Google integration.
- Support for Google Analytics website tracking added at domain and client branding level.

Google integration can be configured in Accura via the Setup – System menu, and via the website Admin area 'Settings\Google' tab.

In order to use the Google Map and Analytics, you will need a Google account to be able to sign up for an integration API key. An API key is a unique code that allows one computer system to talk to another and call on specific functions.

When you have a Google account, you will need to sign-up for a Maps API key which you can do [here](#). Once done you will be given an API key which looks similar to this format - *AlzaSyXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXX*. This key should then either be entered into Accura through the Setup - System settings or in Accura Online's Settings page.

For the Google Analytics, you should sign-up [here](#). After completing the new account sign-up, you will be given a Tracking ID will be in a format similar to this - *UA-000000-0*. This should then be entered in your Accura Online in the main Settings page or in Client Branding for client specific tracking. You can set up multiple tracking accounts (up to 100) in your Goggle Analytics account so you can track each of your domains and/or clients.

Some of the above steps can seem very technical. If in any doubt you should consult your IT provider for assistance.

Address Management & Permissions

New addresses (e.g. Accura sub-offices) can be created and edited in the 'My Account' area and will sync back to Accura.

The screenshot shows a form titled 'Address Form' with the following fields: 'Code (required)', 'Company name (required)', 'Address 1 (required)', 'Address 2', 'Address 3', 'Town (required)', 'County', and 'Postcode (required)'. At the bottom right, there are two buttons: a red 'Cancel' button and a green 'Add' button.

Custom delivery address and contact information in orders is now entered via a pop-up address form.

Full control over the visibility and editing of billing and delivery details in quote and order requests and checkout.

The Security profile page in Admin area has been re-designed to group permissions into logical groups.

| Delivery and Invoice Permissions | General Account Permissions |
|---|--|
| <input checked="" type="checkbox"/> View billing address in requests | <input type="checkbox"/> View data owned by other accounts |
| <input checked="" type="checkbox"/> Edit billing address in requests | <input type="checkbox"/> Approve order requests |
| <input checked="" type="checkbox"/> Edit delivery address in requests | <input type="checkbox"/> View prices |
| <input type="checkbox"/> View invoice PDFs in orders | <input checked="" type="checkbox"/> Manage addresses (offices) |
| <input type="checkbox"/> View delivery note PDFs in orders | |

The new permissions work as follows:

'Manage addresses (offices)' controls the ability for accounts to manage addresses in the 'My Account' area.

'View billing address in requests' shows or hides the billing contact and address on quotes and orders.

'Edit billing address in requests' allows editing of billing contact and address on quotes and orders. When the billing address can be viewed but not edited, it is displayed as read-only.

'Edit delivery address in requests' permission allows editing of delivery contact and address on quotes and orders. Delivery details cannot be hidden, but if they are not editable they default to the current account and still allow 'Custom' delivery details to be entered.

Enhanced Colour Customisation

Widgets in the Admin area now feature full configuration of background and text colouring to improve website customisation and client branding.

Header

Select Header Type

Header Style Minimal

Header Top Background Colour: c487c4

Header Bottom Background Colour: f2c7f2

Header Top Secondary Text Colour: 171517

Header Bottom Text Primary Colour: 614361

Color picker for f2c7f2: R: 242, G: 199, B: 242, # f2c7f2

Buttons: Cancel, Update

Pop-up colour pickers (as an alternative to the RGB# colour picker shown above) have been added to the Theme, Slide and Widget colour configuration options in the Admin area.

These display the site logo image, or (on slides) the current slide image, and allow you to hover over the image to sample a colour from it.

This makes website customisation and client branding much easier to manage.
